Professional Summary

I am a Computer Engineering Undergraduate (8th Semester) specialized in **Cloud Native technologies** and **DevOps methodologies**. Certified in IBM DevOps and Oracle AI, with practical exposure to building CI/CD pipelines using **Tekton** and **Kubernetes**. Passionate about infrastructure automation and cloud architecture. Seeking a **DevOps or Cloud Engineering Internship** to apply skills in a production environment.

Education

Bachelor of Engineering , <i>The German University in Cairo</i>	10/2022 – present
IGCSE , <i>Nefertari British International School</i>	09/2009 – 06/2022

Technical Skills

Cloud & DevOps: Docker | Kubernetes | Tekton Pipelines | IBM Cloud | Linux System Administration

Networking: TCP/IP, DNS, Subnetting, VLANs | Cisco Packet Tracer (Network Simulation)

Languages: Java | Python | C++ | SQL | Javascript | Bash Scripting

Web & Backend: MERN Stack | Restful APIs | Microservices

Tools & Testing: Git/GitHub | Selenium | Postman

Projects

DevOps & Cloud Engineering Capstone *Technologies: IBM Cloud, Kubernetes, Tekton, Docker, Python*

- Designed a Continuous Integration and Continuous Deployment (CI/CD) pipeline to automate the release lifecycle of microservices.
- Containerized backend services using **Docker** and orchestrated deployments on **Kubernetes** clusters for high availability.
- Implemented **Tekton pipelines** to automate building, testing, and deploying code to the IBM Cloud Code Engine.

Campus Connect - University Event Management System *Technologies: Node.js, Express.js, MongoDB, React*

- Engineered a scalable RESTful API** backend to handle high-concurrency requests for university-wide event scheduling and resource allocation.
- Designed complex MongoDB schemas** utilizing indexing and aggregation pipelines to optimize data retrieval for real-time event filtering and student RSVPs.
- Implemented enterprise-grade security** using **JWT** for stateless authentication and **Role-Based Access Control (RBAC)** to strictly enforce permissions between Admins, Student Orgs, and Attendees.

Telecom Database, *Team Member- ASP.net, C#, MySQL, CSS, HTML*

- Designed a normalized relational database schema in **MySQL** to manage subscriber data and billing records.
- Built a secure web interface using **ASP.NET** for admin supervision and customer service operations.

Attack On Titan, *Team Member- Java OOP*

- Architected a complex tower defense game utilizing advanced **Object-Oriented Programming (OOP)** principles.
- Designed a scalable game loop and event-handling system to manage multiple concurrent entities (titans, weapons, lanes).

Certifications

IBM DevOps and Software Engineering Professional Certificate *IBM*

Oracle Cloud Infrastructure AI Foundations Associate (1Z0-1122-25) *Oracle*

Professional Experience

Link Development, *Software Quality Control Intern*

07/2025 – 08/2025

- Conducted comprehensive **Manual and Automated Testing** for enterprise-scale CRM and Application Portals.
- Analyzed **Requirement Specification Documents (RSD)** to design test cases and ensure alignment with client business logic.
- Executed automation scripts using **Selenium** and **Katalon Studio**, reducing regression testing time.
- Reported and tracked defects using **Azure DevOps**, collaborating with developers to verify fixes.
